

Brokers International and Waukee High School: Real-world experience beyond the classroom.

Brokers International is partnering with Waukee High School's successful School-to-Work internship program. Starting this summer through next fall, one Waukee High School upperclassman will intern in the Brokers International Information Technology Department.

"Waukee has an excellent School-to-Work program and Brokers International is delighted to participate. We fully understand the value students can receive from local businesses offering real-work experience and we look forward to working with Waukee High again in the future," commented Tonja Clark, Director of Human Resources at Brokers International.

The purpose of the School-to-Work program is to offer selected students the opportunity to receive on-the-job experience in an interested field, and five college credits from Des Moines Area Community College (DMACC). The school hand picks the students during their junior year based on the students' attendance record, GPA and teacher recommendations.

"School-to-Work provides students with the opportunity build relationships with community partners that would not be possible from a school building. The opportunity to learn in a real-world setting deepens understanding and maximizes the potential of each individual who participates in the program," Mindi Heitland, School-to-Work Teacher at Waukee High School said.

ABOUT BROKERS INTERNATIONAL
